

RoHS certificate of Compliance on UV-A lamps

Date : January 2006
File number : YO-RH/01
Version : 1.1

This RoHS certificate provides information regarding the materials used in the manufacture of the UV-A lamps which are outlined below. The specifications for these UV-A lamps are in compliance with the European union directive 2002/95/EC, "Restrictions of use of Hazardous Substances"

The following details apply to the specifications of the UV-A lamps

A) The following substances are below the maximum allowed concentrations as outlined in the RoHS

| | |
|-------|------------------------------------|
| PB | (Lead) |
| CD | (Cadmium) |
| CR6+, | (Hexavalent Chromium) |
| PBDE | (Poly-Brominated diphenyl esthers) |
| PBB | (Poly-Brominated biphenyls) |

B) Use of Hg (mercury)

It is a fact that the mercury is an essential element in making fluorescent lamps. However, in terms of this RoHS, the content of mercury in fluorescent lamp with halo-phosphor powder is limited to less than 10 mg, while that in fluorescent lamp with Triphosphor Powder in common life and long life are limited to less than 5 mg and 8 mg respective.

By means of this writing we can confirm that our UV-A lamps and green lamps, type 11 watt 15 watt, 18 watt, 20 watt and 40 watt are in full compliance to meet the specifications as outlined in the RoHS directive
