DECLARATION

This document is to ensure that we manufacture the glue adhesive boards for UV-LIGHT EFK (Electrical Fly Units) using as a raw material a UV resistant hot melt glue with the below specifications:

“HL 2405 Hot Melt Pressure Sensitive Adhesive USE HL 2405 is a permanent hot melt pressure sensitive adhesive developed as glueing raw material for the manufacture of insect entrapments like fly strips.

PROPERTIES

Very tacky surface.

Good melt stability.

Very good resistance versus UV light.

SPECIFICATION

Colour transparent

R&B Softening Point approx. 66 °C

Viscosity approx. 1000 mPas at 150°C”

STABILITY

Glue is not getting dry for more than 2 months when is directly exposed to UV-LIGHT.
